SCHUNK Selection kit

The all-round package for a wide range of applications

Hand in hand for tomorrow

SCHUNK Selection kit

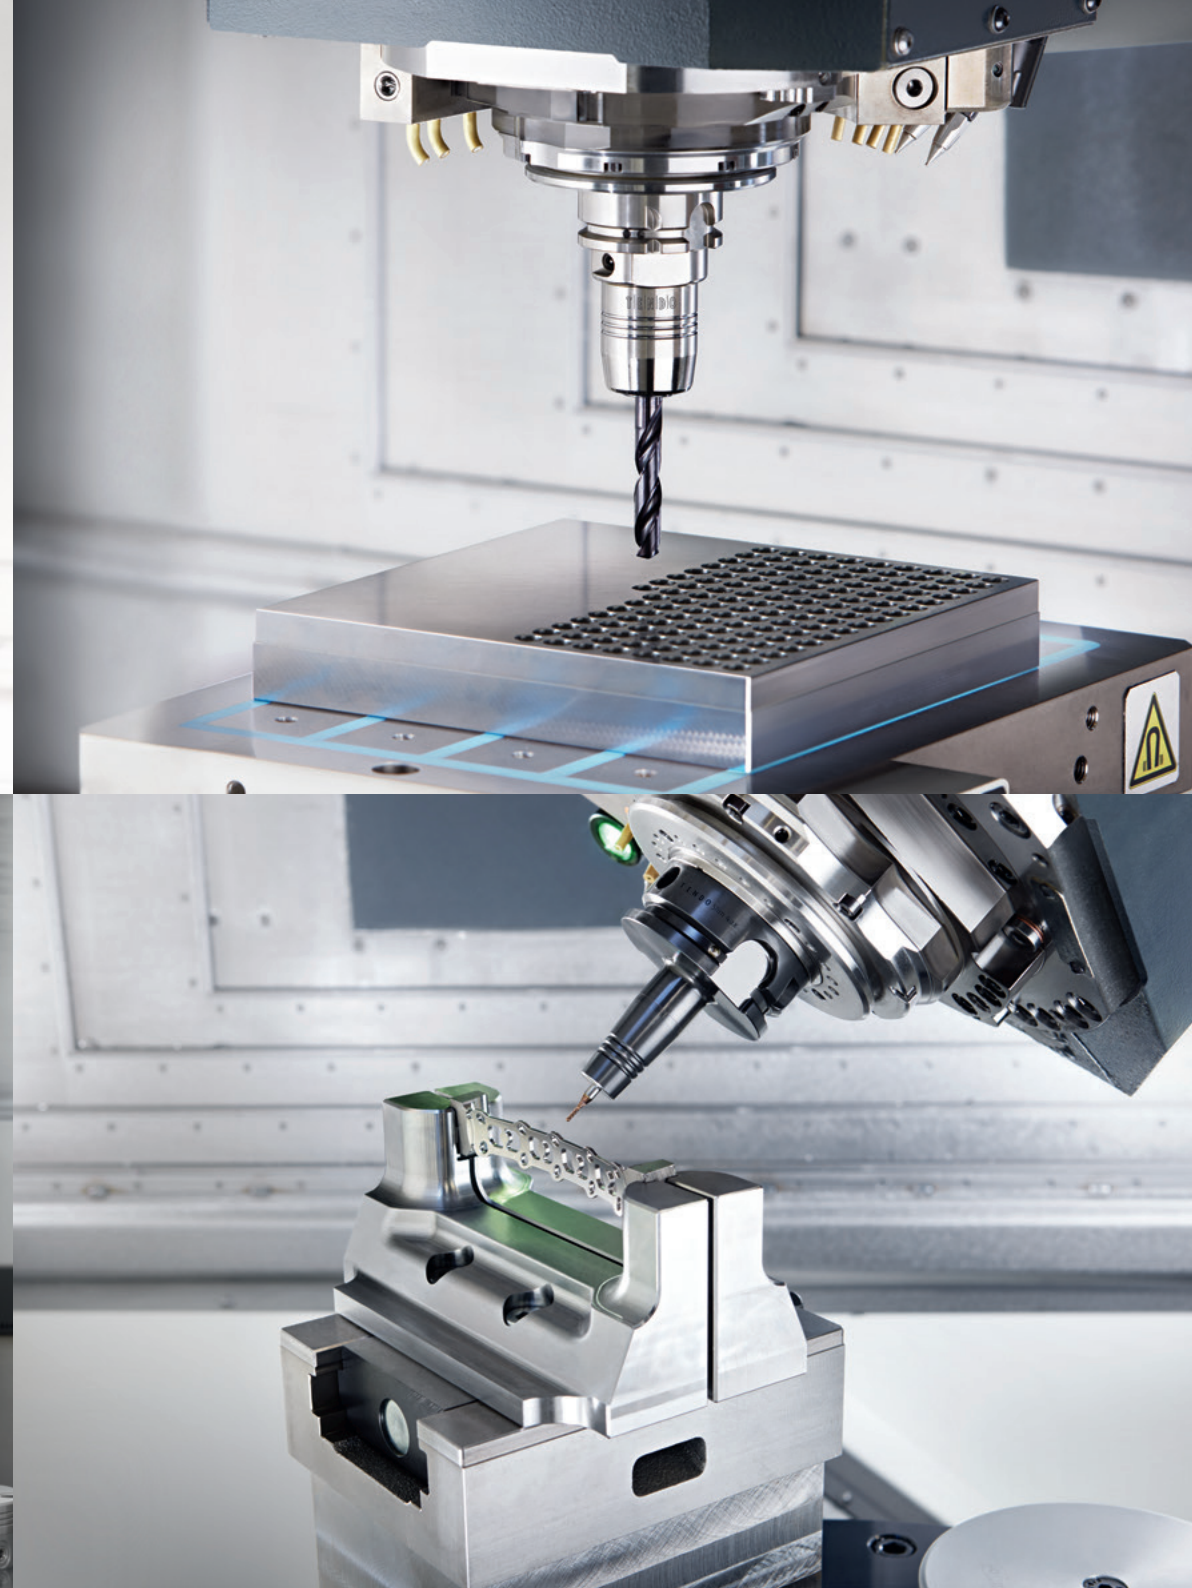

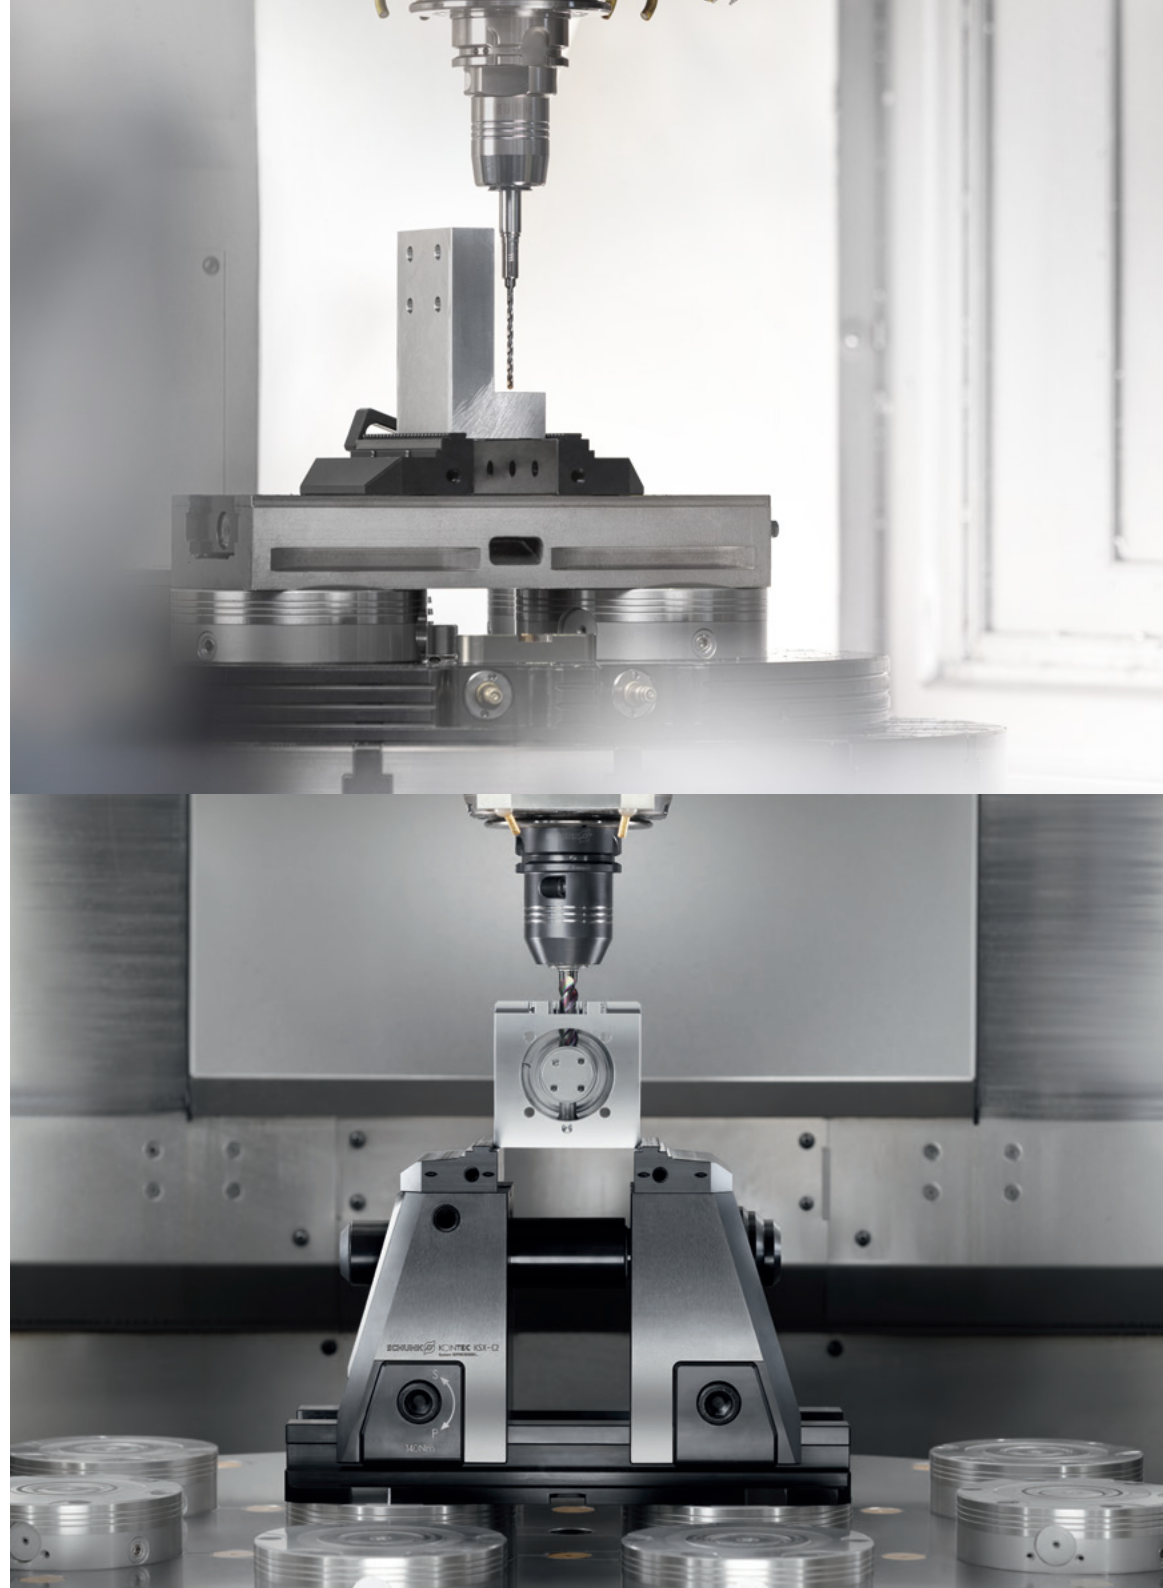

From compact and radially rigid to long and optimized for interference contours

From milling applications to precision machining and machining of hard-to-reach areas. With the SCHUNK Selection kit you are prepared for a wide range of applications.

The set consisting of TENDO Silver, TENDO Slim 4ax and TENDO E compact covers up to 26 different application variants in combination with the included intermediate sleeves and clamping extensions. This means you are perfectly prepared for a wide range of applications. Whether drilling, milling, finishing or threading, the set offers a suitable combination for almost everything.

With the SCHUNK Selection kit, you are not only equipped for existing applications, but also for future applications. The set is therefore particularly suitable for users with small batch sizes or frequently changing requirements.

All components are easy to handle and can be used directly without additional peripheral devices. In addition, the SCHUNK Selection kit fits seamlessly into the SCHUNK component world and can be easily expanded at any time.

Advanced toolholder Technology in one package

The SCHUNK Selection kit is available for the CAT40, HSK-A63 and BT30 interfaces

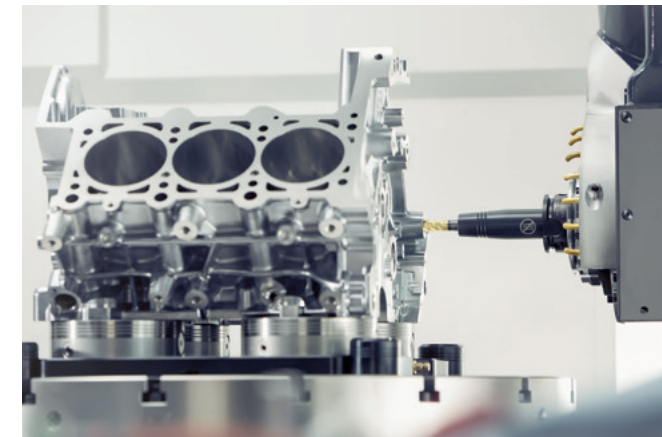

- + TENDO Silver**
Affordable entry into hydraulic expansion technology with the best price-performance ratio in direct clamping.
- + TENDO E compact**
The TENDO E compact hydraulic expansion toolholder impresses in milling, drilling, reaming, threading and HPC applications. With up to 300 % longer tool service life.
- + TENDO Slim 4ax**
Hydraulic expansion toolholder with heat-shrinking contour to DIN 69882-8 for axial machining and and radial fine machining.

- + TRIBOS SVL**
By using TRIBOS SVL extensions, standard cutting tools can be used instead of expensive special tools.
- + GZB-S Intermediate sleeves**
SCHUNK intermediate sleeves enable the clamping of several different shank diameters with just one toolholder.
- + TRIBOS-Mini SVP**
With the updated clamping unit TRIBOS-Mini SVP, tools can be changed in a matter of seconds.

The set with the decisive added value

- + Up to 26 different application possibilities**
Through the combination of toolholders, intermediate sleeves and clamping extension
- + Impressive technology mix**
Proven hydraulic expansion technology, polygonal clamping extensions and intermediate sleeves
- + High flexibility**
Milling, threading, drilling and finishing – all in one package
- + Available interfaces**
CAT40, HSK-A63 and BT30
- + Compatibility**
The SCHUNK Selection kit can be expanded with complementary products at any time
- + Easy handling**
All components can be easily combined with each other and are ready for immediate use
- + Wide range of applications**
from powerful machining to precision fine machining and the machining of hard-to-reach areas

Cylinder head machining with the TENDO Slim 4ax

Inserting grooves with the TENDO E compact

PROMO

Get it now at a special price!

The SCHUNK Selection Kit is available for the CAT40, HSK-A63 and BT30 interfaces and comes with an actuating key, GZB-S sleeve puller and SVP clamping device. Promotion period until **May 31, 2025**
